Allowable Subject Matter

1. **Claims 1-24 are allowed.**
2. The following is an examiner's statement of reasons for allowance:
3. **As to claims 1, 9, and 17,** the prior art fails to teach a system and a method wherein a user directly accesses a database, and for each classified entry the database asks a classification engine, by inputting classification parameters into the classification engine, whether the user is authorized to access the requested entry. Upon approval the user is allowed to access the requested data. Furthermore the method also comprises decision cache which temporarily stores results of the recent verifications so that the cache is checked to determine whether one of the indicators of approval or non-approval was returned for the same set of arguments for relevant classification parameters, and the external classification is not called if the data is still present in the cache.
4. **As to claims 2-8, 10-16 and 18-24,** those claims are allowed by the virtue of their dependency on claims 1, 9 and 17 respectively.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
